Englekirk

Design Engineer (Honolulu, HI)

Englekirk is seeking entry level engineers to join our firm with design opportunities in a wide variety of challenging project types. We are seeking engineers who are self-motivated, have strong technical engineering skills and strong verbal and written communication skills.

Why Englekirk?

If you are looking for an environment where you can work on a wide variety of interesting and complex projects that will expose you to all types of building materials and design methods while also getting to work alongside some of the top individuals in the industry, then this is the firm for you.

We believe that our staff is our biggest asset. We are committed to recruiting individuals with strong educational and diverse backgrounds, while fostering an environment where our employees can continue to grow. To achieve these goals, we developed and maintain mentorship and continuing education programs that are instrumental in both your success and the success of the company.

Required Skills

- 0-5 years structural engineering experience
- BS in Civil/Structural Engineering with emphasis in structures
- MS in Civil/Structural Engineering Degree required
- Strong verbal and written communication skills
- Able to work well in team-based environment
- Motivated to invest in development of professional growth

About our Firm

Founded over 50 years ago, our name is synonymous for innovative design and award-winning creativity, and we're looking for motivated, creative-thinking structural engineers who are ready to help design some of Hawaii's most memorable structures. We help shape the future of our profession; our principals are involved in the writing of codes and standards both on the national and local level, such as for AISC, ASCE, ACI, and the LA Tall Building Structural Design Council, and we encourage our staff to become the future leaders of the industry.

We have a corporate-wide staff of over 100 employees (with our Headquarters in Los Angeles and an office in Orange County). Our passion for structural and earthquake engineering pushes us to be better. Come design with us. Learn and work alongside talented structural engineers on exciting projects. But be prepared to be challenged. Your mind and skills will be stretched in the very best way.
